

ANIMAL CLUES

ACTIVITY DISCUSSION GUIDE

DISCUSS THE ACTIVITY TO PROMOTE LEARNING.

WHY WE SHARE SCIENCE EXPERIENCES

Talking about an experience helps children learn. So take some time to discuss the science concept (Science Big Idea) in Animal Clues to support children's understanding.

SCIENCE BIG IDEA

Animals have different body parts that help them move from place to place, take in information, protect themselves, and meet their basic needs for food, water, and air.

TALK ABOUT THE ACTIVITY

Use these prompts for discussion after the Animal Clues activity.

1. Remind the group about what happened in Animal Clues.
2. Display two or three Animal Pictures. Ask children these questions to help them connect the Science Big Idea:
 - *What body parts do these animals have that help them move from place to place?*
 - *What body parts do these animals have that help them take in information?*
 - *What body parts do these animals have that help them protect themselves?*
 - *What body parts do these animals have that help them get food, water, and air?*
